ALATUS-M

ULTRALIGHT MOTORGLIDER

Manufactured by Aerola company, Alatus-M is a microlight motorglider offering compactness of hanglider, comfort and performances of sailplane and ease of use of microlight.

It has been designed to comply with German standards LTF-UL and DULF LFG and with FAR-103 standards.

The engine pylon totally retractile allows very good gliding performances. It can be powered with a 20 hp 2 stroke engine or with a 26 hp electric engine. the cockpit is spacious and vented and gives an excellent visibility.

The aircraft can be dismantled by one person in about 40 minutes and carried on an ordinary car.

Each plane is delivered with its transport covers.
